Deputy of Research and Technology

## Safe and Sustainable Infrastructure for Health Care Facilities: Iran

 POPULATION: 84,926,000

 HEALTH CARE FACILITIES  
number and categories in the  
country: 33854

Dr. Mohammad Khazaei  
Associate Professor of Environmental Health  
Engineering  
Research Center for Health Sciences  
Hamadan University of Medical Sciences

### Status of WASH, waste, environmental cleaning, and energy (Improved) services in HCFs:

 98%

 98%

 96%

 88%

 92%

### MAJOR ACHIEVEMENTS IN WASH, WASTE & ENERGY SERVICE DELIVERY

Full coverage of water distribution network throughout the country including urban and rural areas and continuous monitoring of these resources by the MOHME.

### WASH FIT IMPLEMENTATION & Sustainability (Total (urban and rural, PHC, Others))

Although WASH FIT is not implemented, the baseline assessments, situation analysis, and intervention recommendations conducted in an integrated manner. Also, an online platform developed to be used for regular updates and follow ups for decision makers.

### CLIMATE-RESILIENT, ENVIRONMENTALLY SUSTAINABLE ACTIVITIES

- Situation analysis of 267 HCFs in 6 climate representative provinces of Iran on climate resilience and environmental sustainability, in terms of Water, Sanitation, and healthcare waste management; Health workforce; Energy; Infrastructure, technology, and products
- A detailed set of national strategic directions for the improvement of climate resilience and environmental sustainability of HCFs developed
- The evaluation results determined that hospitals are better at climate resilience and environmental development than other healthcare centers.
