RELX Group™

▶ پایگاه Clinical Key ، مجموعه ای از محصولات انتشارات Elsevier می باشد.

▶ یک موتور جستجوی بالینی و یک پایگاه اطلاعاتی قدرتمند که جامعیت ، مورد اطمینان بودن و سرعت در بازیابی اطلاعات و پاسخگویی از مزایای آن محسوب می شود.

▶ مجموعه ای است از مجلات ، کتاب ، راهنماها ، اطلاعات دارویی ، تصاویر ، ویدیوهای پزشکی و جراحی و شواهد بالینی مورد نیاز پزشکان ، پیرا پزشکان ، دانشجویان و بیماران

این مجموعه حاوی :

بیش از ۵۰۰ عنوان مجله پزشکی و جراحی از انتشارات *Elsevier*

بیش از ۱۱۰۰ عنوان کتب مرجع پزشکی و جراحی

مجموع کامل ۵۷ عنوان مجله از مجلات *Clinics of north America*

آموزش بیش از ۳۵۰ تکنیک جراحی و ۴۵۰ عنوان شرح عمل جراحی

مقالات بالینی و شرح بیماریهای مبتنی بر شواهد بیش از ۷۵۰ بیماری

دسترسی به بیش از ۱۵۰۰۰ راهنمای آموزش بیمار

حدود ۱۲۰۰۰ ویدیو پزشکی

حدود ۵۰۰۰۰۰۰ تصویر پزشکی

بیش از ۴۰۰۰ راهنمای عملی بالینی

اطلاعات بیش از ۲۹۰۰ دارو که توسط شرکت *Gold standard* فراهم شده و به روزرسانی می شود.

۲۰ میلیون خلاصه مقاله مدلاین که به صورت روزانه از کتابخانه ملی پزشکی به این مجموعه اضافه می گردد.

- ▶ این سایت قابلیت جستجو با کلمه ، عبارت و مخفف دارد.

ClinicalKey®

Lead with answers.

The screenshot shows the ClinicalKey website interface. At the top, there is a navigation bar with links for English, CME, Login, and Register. The main header features the ClinicalKey logo and the tagline "Lead with answers." Below the header, there is a search bar with the placeholder text "Search for diagnoses, conditions, drugs and more..." and a magnifying glass icon. To the left of the search bar is a dropdown menu labeled "All Types" with a list of content types: All Types, Books, Journals, Clinical Trials, Drug Monographs, Guidelines, Patient Education, First Consult, MEDLINE®, Multimedia, and Procedures Consult. A green box on the left side of the page lists Persian translations for these content types: کتاب مجله (Book), کار آزمایشی بالینی (Clinical Trials), اطلاعات دارویی راهنماها (Drug Monographs), آموزش بیمار مشاوره بالینی (Patient Education), مدلاین (MEDLINE®), چند رسانه ای (Multimedia), and مشاوره جراحی (Procedures Consult). A green box on the right side of the page contains Persian text: "برای محدود کردن جستجو به منابع مورد نظر ، از کادر کشویی سمت چپ می توان استفاده کرد." (To limit the search to the desired sources, you can use the dropdown menu on the left side). A blue box in the center of the page highlights the "Featured Content: Zika Virus" section. The bottom of the page includes a footer with the RELX Group logo and a cookie notice.

Infections in the Elderly

دسترسی به فولتکست

Kent B. Crossley and Phillip K. Peterson

Mandell, Douglas, and Bennett's Principles and Practice of Infectious Diseases, 315, 3459-3465.e3

Keywords

bacteremia, decubitus, elderly, enterohemorrhagic *Escherichia coli*, herpes zoster, influenza, pneumonia, tuberculosis, urinary tract infection, West Nile virus

Short View Summary

GENERAL CONSIDERATIONS

- People living past 65 years of age are rapidly increasing in number.
- Individuals older than age 65 years have a higher incidence of most infections than do younger people.
- For nearly all infections, clinical manifestations are more subtle in the elderly.

URINARY TRACT INFECTION

- Asymptomatic bacteriuria should not be treated.
- Symptomatic infection is often caused by organisms other than *Escherichia coli*.
- Extended-duration therapy (i.e., >7 days) of symptomatic infection is not needed in either men or women.

■ نحوه جستجوی مقاله

با وارد کردن کلمه geriatric در کادر جستجو و انتخاب Journals ، مقالاتی با موضوع geriatric نمایش داده خواهد شد. فولتکست مقالات با کلیک بر روی آیکن Pdf قابل دانلود است.

برای اخص کردن مقاله می توان از Filter موجود در بالای مقالات بازیابی شده استفاده کرد:

۱-نوع مقاله را در قسمت Source type مشخص می کنیم:

* مقالات دارای فولتکست (Full text article):این مقالات را می توان در سایت مطالعه کرد یا متن کامل آنرا با کلیک بر روی Pdf دریافت و ذخیره و پرینت کرد.

* مقالات مدلاین (Medline) : این مقالات بصورت چکیده در سایت هستند و برای دریافت متن کامل مقاله ، شما را آخر چکیده مقاله ، در قسمت NLM citation ID به آدرس آن در سایت پابمد ارجاع می دهند.

۲-نوع مطالعه را در قسمت Study type مشخص می کنیم:

* systematic review

* meta analysis

* randomized control trials

* narrative review

۳- مقاله را می توان از نظر موضوعی اخص تر کرد. برای این منظور از Specialties استفاده می کنیم. با باز کردن لینک کشویی مزبور ، موضوعات اخص تر را می توان دید و از آنها برای جستجوی بهتر استفاده کرد.

۴- و در آخر ، مقالات بازیابی شده را در حیطه زمانی مشخص می توان جستجو کرد.

Ageing Research Reviews, 2016-05-01, Volume 27, Pages 23-36, Copyright © 2016 Elsevier B.V.

Graphical abstract

```
graph LR; PI[Pharmaceutical Industry] --> RA[Regulatory authorities]; RA --> HP[Healthcare Providers]; HP --> PP[Pediatric Patients]; HP --> AD[Adults]; HP --> GP[Geriatric Patients]; PP --> PIP[Pediatric Investigation Plan (PIP)]; AD --> CCT[Current clinical trials]; CCT --> CD[Current drugs]; GP --> GIP[Geriatric Investigation Plan (GIP)];
```

Highlights

- There is lack of knowledge on the benefit/risk ratio of medicines in the elderly.
- Current regulatory status on the development of geriatric medicines is poor.
- The different stakeholders should be involved.

Abstract

Top of Page

with rare missense alleles in genes other than CFI. Genotyping in 5,115 independent samples confirmed associations with AMD of an allele in C3 encoding p.Lys155Gln (replication $P = 3.5 \times 10^{-5}$, OR = 2.8; joint $P = 5.2 \times 10^{-9}$, OR = 3.8) and an allele in C9 encoding p.Pro167Ser (replication $P = 2.4 \times 10^{-5}$, OR = 2.2; joint $P = 6.5 \times 10^{-7}$, OR = 2.2). Finally, we show that the allele of C3 encoding Gln155 results in resistance to proteolytic inactivation by CFH and CFI. These results implicate loss of C3 protein regulation and excessive alternative complement activation in AMD pathogenesis, thus informing both the direction of effect and mechanistic underpinnings of this disorder.

Acetaminophen

[⊕](#) [Acphen](#) | [Aceta](#) | [Actamin](#) | [Anacin Aspirin Free](#) | [Apra ...](#)

Drug Information Provided By Gold Standard

Description: Acetaminophen (APAP, paracetamol) is a para-aminophenol analgesic and the active metabolite of phenacetin. Due to the toxic effects of phenacetin at therapeutic doses and the availability of acetaminophen, phenacetin is no longer used. Acetaminophen possesses analgesic and antipyretic activity similar to aspirin; however, acetaminophen has no peripheral antiinflammatory activity or effects on platelet function. Acetaminophen was first used in clinical medicine in the 1890's. It is effective in the relief of both acute and chronic pain and may be preferred over NSAIDs due to fewer hematologic, GI, and renal effects. Acetaminophen is the preferred analgesic/antipyretic for patients in whom aspirin is contraindicated and in those with underlying renal disease for episodic, though not chronic, use.²³⁹⁷⁷ In addition, acetaminophen has been recommended by the American Lung Association as the first line treatment for aches and pains associated with the flu, by the American Geriatrics Society for both minor and persistent pain in elderly patients³⁵⁸¹⁴, and by the American College of Rheumatology as first-line therapy for osteoarthritis of the hip or knee³⁵⁹⁷⁸. The drug has a history of safe and effective use; however, unintentional or intentional misuse of acetaminophen is the number one cause of acute hepatic failure in the U.S.³²²⁰² Acetaminophen was first approved by the FDA in 1950. Intravenous acetaminophen (Ofirmev) was approved by the FDA in November 2010 for the treatment of pain and fever in adults, adolescents, and children over the age of 2 years.⁴²²⁸⁹

Mechanism of Action: The exact mechanism of action is unknown, but acetaminophen is thought to mediate its actions centrally through activation of the descending serotonergic pathways. Acetaminophen is believed to increase the pain threshold by inhibiting prostaglandin (PG) synthesis through the cyclooxygenase (COX) pathway, similar to nonsteroidal anti-inflammatory drugs (NSAIDs). Though

چنانچه به دنبال جستجوی دارو برای درمان بیماری خاصی هستیم نیز نام بیماری در کادر جستجو نوشته شده و محتوا بر روی Drug monographs قرار می گیرد. بطور مثال بیماری میگرن در کادر نوشته شده و جستجو می گردد.

Migraine Headache
Disease Overview > View Full Topic
Ferri's Clinical Advisor 2016 · Ferri, Fred F., M.D., F.A.C.P.

Definition

Migraine headaches are recurrent headaches that are either preceded by a focal neurologic symptom (migraine with aura), occur independently without preceding focal neurologic symptoms (migraine without aura), or have atypical presentations (migraine variants). The migraine aura typically is characterized by visual or sensory symptoms that develop over 5 to 60 min. If aura includes motor weakness, the migraine is referred to as hemiplegic. In migraine with and without aura, the headache is typically unilateral, pulsatile, and associated with nausea and vomiting, photophobia, and phonophobia. Migraines that occur ≥15 days every month for ≥3 months are known as chronic; otherwise, they are referred to as episodic.

DOs and DON'Ts in Managing Asthma:

PATIENT EDUCATION
CARING FOR YOUR CHILD WITH ASTHMA

Copyright © 2011 by Saunders, an imprint of Elsevier, Inc..
Last revised: June 2, 2012.

In asthma, normal airflow in airways (bronchi) is blocked. It most often starts in childhood. Children have small airways, so their asthma is especially serious.

Asthma attacks may be caused by pollen, dust, dander, smoke, cold weather, flu, and stress.

Symptoms include wheezing, coughing, chest tightness, and

Asthma across the ages: Knowledge gaps in childhood asthma

Journal of Allergy and Clinical Immunology, The.

Szefer, Stanley J., MD; Chmiel, James F., MD, MPH... [Show all](#)... Published January 1, 2014. Volume 133, Issue 1. Pages 3-13. © 2013.

Fig 1 Airway inflammation in the setting of asthma. The orange box represents activities in the lymph node. The dendritic cell (DC) processes antigens, migrates to the lymph nodes, and associates with TH 0, which then differentiates and migrates back to the airway. A, Noneosinophilic/neutrophilic asthma, B, Eosinophilic asthma. Remodeling occurs in patients with all forms of asthma but is only shown in Fig 1, B. EPO, Eosinophil peroxidase; ICAM-1, intercellular adhesion molecule 1; LTB₄, leukotriene B₄; Mφ, macrophage; MBP, major basic protein; MMP, matrix metalloproteinase; PAF, platelet-activating factor; Treg, regulatory T cell; TSLP, thymic stromal lymphopoietin.

Asthma in Children

Disease Overview

[View Full Topic](#)

Conn's Current Therapy 2016 · Bope, Edward T., MD; Kellerman, Rick...

Epidemiology

Asthma prevalence in the United States has been on the rise since the 1990s. It is currently estimated that 9.6% of children younger than 18 years (7.1 million children) carry the diagnosis of asthma. Male sex, African American or Puerto Rican ethnicity, and lower socioeconomic status are associated with an increased risk of developing asthma. Prevalence estimates for these groups are as high as 11% to 16%.

Asthma has a significant impact on both school attendance and health care expenditures. According to the National Health Statistic Report in 2007, children made 640,000 emergency department visits and were hospitalized 157,000 times as a result of asthma. In 2008 it was estimated that there were 10.5 million missed school days, and about 5% of children reported long-term limitations on their usual activities due to asthma symptoms.

Pancreatic Cancer
Disease Overview | View Full Topic
Goldman-Cecil Medicine · Goldman, Lee, MD; Schafer, Andrew I., MD

◆ **Definition**

Pancreatic cancer usually refers to ductal adenocarcinomas of the pancreas, because more than 90% of pancreatic tumors arise from the ductal epithelium. Other major tumors of the pancreas include endocrine malignancies (Chapter 195), carcinoid tumors (Chapter 232), lymphomas (Chapter 185), and a variety of rare sarcomas.

◆ **Epidemiology**

Pancreatic ductal adenocarcinoma (PDAC) has one of the highest incidence-to-mortality ratios of any disease. Although it represents the tenth leading cause of cancer in the United States, it is the fourth leading cause of cancer-related deaths, ¹ because the vast majority of patients will die from their disease. Annually, approximately 40,000 individuals will die in the United States from PDAC or its complications. The

CLINICAL TRIAL

Safety Study of Nivolumab With Nab-Paclitaxel Plus or Minus Gemcitabine in Pancreatic Cancer, Nab-Paclitaxel / Carboplatin in Stage IIIB/IV Non-Small Cell Lung Cancer or Nab-Paclitaxel in Recurrent Metastatic Breast Cancer

First received on December 3, 2014. Last updated on March 30, 2016.

Purpose

The purpose of this study is to assess safety of nab-paclitaxel based chemotherapy regimens administered prior to and/or in combination with nivolumab in Pancreatic Cancer, Non Small Cell Lung Cancer (NSCLC) and Metastatic Breast Cancer (mBC).

Status	Recruiting
Condition	Breast Neoplasms
Phase	Phase 1
Study Type	Interventional
Study Design	Allocation: Randomized, Endpoint Classification: Safety Study, Intervention Model: Parallel Assignment, Masking: Open Label, Primary Purpose: Treatment
Official Title	A Phase 1, Open-label, Multicenter, Safety Study of Nivolumab (Bms-936558) in Combination With Nab-pacitaxel Plus or Minus Gemcitabine in Pancreatic Cancer, Nab-paclitaxel/Carboplatin in Stage IIIB/IV Non-small Cell Lung Cancer or Nab-paclitaxel in
